Precipitation probability					
30%	30%	20%	10%	10%	40%

Forecast for Friday 17 Nov 2023

Weather: Remnants of the rain band clearing east during the early hours to leave patchy cloud and clears spells. Any significant cloud breaks may allow for some isolated fog and shallow fog patches to form rapidly around dawn. A few scattered showers possible during the first part of the morning, otherwise dry with sunny spells. Clouding over during the afternoon but remaining bright. Low cloud and rain arriving from the west by midnight.

Chance of cloud-free hill tops above 600m: 80%

Low Cloud and visibility: Few or scattered cloud base 400-600m at times, mainly in association with rain at first or showers during the morning. Visibility mostly very good but temporarily reducing in rain or showers and in early fog patches.

Forecast for Saturday 18 Nov 2023

Weather: A band of rain will push eastwards overnight and during Saturday morning giving heavy outbreaks at times. This will have mostly cleared into the afternoon giving drier and brighter conditions with sunny spells, perhaps the odd shower later.

Maximum wind: Southeasterly 20-25mph gusting 35-45mph, becoming southwesterly into the afternoon but remaining strong especially over the tops of the hills.

Chance of cloud-free hill tops above 600m: 20% increasing 60-70% by mid-afternoon

Low Cloud and visibility: Broken low cloud base 200-400m during the morning, lifting and breaking to few or scattered 600-800m from mid-afternoon. Moderate visibility in rain, poor in hill fog, but good in dry conditions.

Temperature: **Valleys:** Plus 6 rising to plus 12 Celsius
At 600m: Plus 3 rising to plus 8 Celsius
Freezing level: Above summits
